Metro Pictures, New York is hosting an exhibition “The Destroyer Cycle” by artist [Robert Longo](#), on view through June 17, 2017.

The exhibition presents 12 new large-scale charcoal drawings by New York based artist Robert Longo (b.1953), through which the artist examines world events captured in the lens of American media. Continuing with Longo’s ardent examination of how to re-engage pictures through drawing, the works on view are testimonies of his unique technique that reflects the medium of the drawing’s source image. Showcased are 12 painstakingly rendered works, as the representations of power, protest, desperation, futility, and aggression, together creating a searing portrait of contemporary world.

The exhibition is on view at Metro Pictures, 519 West 24th Street, New York, NY 10011, USA.
